

## Pharmacy Technician - Program Disclosure

### State Licensure Requirements:

Miller-Motte College's Pharmacy Technician program prepares graduates to sit for the national certification exam to obtain a Certified Pharmacy Technician (CPhT) certification credential. The Pharmacy Technician program is a Pharmacy Technician Certification Board (PTCB) Recognized Education/Training Program. Eligibility requirements for the CPhT include a passing score on the Pharmacy Technician Certification Exam (PTCE) with PTCB or the ExCPT Certification Exam with the National Healthcare Association (NHA).

The following states currently have no licensure requirement to obtain employment as a pharmacy technician, although some may require registration to obtain employment and/or to complete externship:

Delaware	Missouri	Tennessee
Georgia	New Jersey	Vermont
Hawaii	South Carolina	Wisconsin

The following states require additional post licensure training or employer based on the job training.

Oklahoma	West Virginia
----------	---------------

The school has made the determination as shown below which states/US territories accept the CPhT certification credential to fulfill pharmacy technician state licensure requirements and which states do not. The Certified Pharmacy Technician (CPhT) certification credential is recognized as a primary contributing factor to meet the requirements to obtain licensure in:

Alaska	Kansas	North Carolina
Alabama	Kentucky	Oregon
Arkansas	Louisiana	Pennsylvania
Arizona	Maine	Puerto Rico
California	Maryland	Rhode Island
Colorado	Massachusetts	South Dakota
Connecticut	Mississippi	Texas
District of Columbia	Montana	Utah
Florida	Nebraska	US Virgin Islands
Idaho	Nevada	Virginia
Illinois	New Hampshire	Washington
Indiana	New Mexico	Wyoming
Iowa	New York	

Miller-Motte College in Chattanooga fulfills the requirements for licensure by the Florida Board of Pharmacy for the Pharmacy Technician training program (License RTTP1198).

The Certified Pharmacy Technician (CPhT) certification credential is NOT recognized as a primary contributing factor to meet the requirements to obtain licensure in:

American Samoa**	Minnesota
Guam**	North Dakota
Marshall Islands**	Northern Mariana Islands**
Federated States of Micronesia**	Ohio
Michigan	Palau**

As a result, we do not enroll students in the Pharmacy Technician program who are looking to pursue licensure in these states.

*\*\*While the CPhT certification credential may meet the requirements to obtain licensure in American Samoa, Guam, Marshall Islands, Federated States of Micronesia, Northern Mariana Islands and Palau, individuals located in these US territories are not permitted to enroll in online programs at Miller-Motte College.*

The states listed above may not accept the CPhT certification credential and/or may require completion of a state specific board-approved pharmacy technician training program, a program accredited by a specific accrediting agency or training under the direction of a state-specific licensed pharmacist prior to obtaining a state license.

I attest that I have received and read the Pharmacy Technician program disclosure. I understand that in addition to certification and licensure requirements, each state may require that Pharmacy Technicians be registered, complete Continuing Education Units, and/or maintain registration to work in the field.
